

PRODUCT INFORMATION

PROCARE EV ELECTRICPARTS CLEANER

Description

EV ElectricParts Cleaner is your trusted companion for maintaining and protecting your electric vehicle's vital components. This advanced formula offers superior degreasing, corrosion protection, and conductivity enhancement, all while being safe for EV batteries and electronics. Say goodbye to grime, hello to peak EV performance.

Benefits

- **Advanced Degreasing:** Effectively removes grease, grime, and contaminants from EV components.
- **Corrosion Protection:** Guards against corrosion on sensitive EV electronics.
- **Battery-Safe Formula:** Formulated to be safe for use on EV batteries and electrical connections.
- **Quick Drying:** Dries quickly without leaving behind residue, preventing electrical shorts.
- **Silicone-Free:** Does not contain silicone, ensuring compatibility with EV components.
- **Water Repellent:** Provides water-repellent properties, safeguarding EV circuits from moisture.
- **Oxide and Sulfide Removal:** Penetrates and eliminates layers of oxides and sulfides for clean connections.
- **Contact Resistance Reduction:** Minimizes contact resistance, enhancing the efficiency of EV components.
- **Safe for All EV Surfaces:** Suitable for cleaning a wide range of EV components, including charging ports, connectors, and wiring.

Application

- Ensure that the electric vehicle is powered off and disconnected from any charging source.
- Shake the Procure EV ElectricParts Cleaner canister well.
- Hold the canister approximately 15-20 cm away from the components you want to clean.
- Spray a light, even coating of the cleaner onto the components. Pay special attention to heavily corroded areas.
- Allow the product to work for a few minutes on heavily corroded contacts.
- After the recommended wait time, use a clean, dry cloth or a soft brush to gently wipe or scrub the components, removing any remaining contaminants.
- For maximum protection, do not rinse off the product. It leaves a protective barrier against future corrosion.
- Reconnect and power on your electric vehicle, ensuring that all connections are secure.
- Regularly use Procure EV ElectricParts Cleaner for ongoing maintenance and protection of your EV's electrical components.

Notice: !When treating the components it is to be ensured that they are without current.

!When applying to contacts, allow the propellant to evaporate before operating the contacts in order to avoid sparking. Allow the propellant gas to dry off for several minutes. Avoid sparking.

Always follow safety precautions and recommendations provided by the manufacturer for the best results and safe use of the product.

VOLUME

400 ml

PACKAGING

12 Pcs.
1 Box
