

PRODUCT INFORMATION

PRO CARE SYNTHETIC HIGH-PERFORMANCE GREASE

Description

Synthetic High-Performance Grease is fully synthetic high-performance grease for the foodstuffs, beverages and pharmaceutical industries.

Benefits

- Extremely high load-bearing characteristics
- Suitable for use at very high temperatures
- Reduces friction and wear
- Water and wastewater-resistant
- Resistant to hot and cold water
- Excellent corrosion protection
- Suitable for use at extremely high RPM
- Temperature range -50 °C to +220 °C
- NSF H1-registration possible* (human toxology-optimised products)

Application

- For a variety of operating conditions in the foodstuffs, beverages and pharmaceutical industries.
- For all uses other than in the foodstuffs industry predicating water-resistance, a wide temperature range and/or high RPM, e.g. spindle and ball bearings in machine tools, metal processing centers, textile machinery, wire drawing machinery, etc.
