

PRODUCT INFORMATION

PRO CARE AIRLEAKAGE DETECTOR

Description

Airleakage Detector is a bio-degradable testing foam for determining non-tight areas, micro-leaks and hairline cracks. Suitable for all pressurised areas on pipelines (compressed air, oxygen, combustible gases), pressurised containers, compressor systems, compressed air brake systems and welding units as well as non-tight areas on tyres and hoses. With DVGW approval.

Benefits

- Biodegradable
- Frost-proof down to -16°C
- Approved by the German Technical and Scientific Association for Gas and Water (DVGW) (test certificate NG-5170BQ0463)

Application

- Micro-leaks, hairline cracks and non-tight areas on pressurised components
- Pipes (compressed air, oxygen, combustion gases)
- Pressure vessels
- Compressors
- Compressed-air brake systems
- Welding devices
- Air-conditioning units

Instructions

Spray pressure parts from approx. 40 cm. The leak is shown by foam bubbles. Then rinse with water.

VOLUME

400 ml

PACKAGING

12 Pcs.
1 Box
