

PRODUCT INFORMATION

PRO CARE ENGINE START SPRAY

Description

Engine Start Spray for starting all types of engines, especially after prolonged periods of inactivity, low temperatures or wet weather conditions. Protects the engine and battery.

Benefits

- Very good wear and corrosion protection
- Prevents carburettor icing
- Allows the engine to start up, even in low temperatures, in wet weather or after a long period of inactivity

Application

- Vehicle engines (cars, trucks, buses, motorcycles)
- Lawnmowers, forklifts, tractors, boat engines, construction machinery, engine saws, pumps and other industrial equipment

Instructions

Shake can well before use.

For petrol engines: Spray into the carburettor or intake area, such as manifold or air filter.

Spray for 3–5 seconds.

For diesel engines: Spray into the intake area.

Spray for 3–5 seconds.

Notice

! Start the engine immediately after spraying without preheating.

VOLUME

400 ml
