

PRODUCT INFORMATION

PRO CARE CERAMIC PASTE

Description

Ceramic Paste is synthetic grey multi-purpose paste with ceramic pigments. Long-term lubrication for screw connections, resistant to high temperatures.

Benefits

- Very high pressure rating and excellent separating effect
- Water resistant
- Excellent protection against corrosion, oxidation and scaling
- Keeps friction and wear to a minimum
- No oil carbon formation at high temperatures
- More temperature resistant in the separating effect than pastes that contain metals
- Temperature range: -30°C to +1400°C

Application

- Protection of screw connections
- Basic and thin-film lubrication
- Separation lubrication for reliable, trouble-free disassembly
- For even friction values

Instructions

The area to be treated should be dry, free of dust and grease. Shake can well before use. Spray the surfaces to be treated. Allow to dry off briefly.

VOLUME

400 ml

PACKAGING

12 Pcs.
1 Box
