

PRODUCT INFORMATION

PRO CARE LPG ADDITIVE

Description

LPG Additive is a specially developed active substance concentrate for the petrol of gas-powered vehicles (LPG/CNG). Reduces valve wear (valve impact) and ensures the fuel's long-term stability.

Benefits

- Prevents the formation of residues
- Minimises wear on valves and valve seats
- Corrosion protection for the entire fuel system
- Prevents the ageing-related oxidation of petrol
- Prevents deposits in the fuel system thanks to the keep clean effect

Application

- For regular preventive addition to the petrol tank of vehicles with LPG powered engines
- In case of conversion to liquefied petroleum gas operation
- For all maintenance on the system
- For repairs on the system
- Also suitable for natural gas (CNG) vehicles (minimisation of valve wear only in regular operation in petrol mode)

Instructions

Add the contents of the can to the petrol tank.
Recommended to use with each fill up of petrol.
One can is sufficient for up to 80 liters of petrol.

VOLUME

250 ml

PACKAGING

24 Pcs.
1 Box
