

PRODUCT INFORMATION

PRO CARE DIESEL SYSTEM CLEANER

Description

Diesel System Cleaner is a special fuel additive for cleaning fuel and injection systems in diesel engines. A clean injection system ensures low-soot and reduced particle combustion and reduces fuel consumption.

Benefits

- Cleans the fuel system from the tank to the injector
- Improves fuel injection and atomisation
- Prevents diesel knocking and rough idling
- Reduces smoke formation, especially in the full load area
- Reduces diesel consumption

Application

- For increased emissions values
- For increased soot formation and frequent particulate filter regeneration
- For all repairs to the diesel injection system
- For reduced engine power
- Suitable for modern common rail injection systems and pump/nozzle injection systems
- It should be repeated every 5,000 Km

Instructions

Empty the contents of the can into the fuel tank. Sufficient for up to 60 litres of fuel. The fuel quantity should be at least equal to the reserve volume.

Notice: Carry out a test drive (preferably 30 km from the motorway) after the cleaning process.

VOLUME

250 ml

PACKAGING

24 Pcs.
1 Box
