

PRODUCT INFORMATION

PRO CARE ENGINE FLUSH

Description

Engine Flush is a highly effective, low viscosity detergent-based cleaning concentrate. Breaks down deposits in the engine oil system and keeps them in a suspension. When used prior to every oil change, protects the new oil from previous contamination.

Benefits

- Contains low-viscosity detergents to deliver outstanding cleaning results
- Removes oil sludge deposits from the engine oil system
- Contains additives to lubricate components during the cleaning process
- Protects the engine from being damaged as a result of blocked oil channels and bore holes
- Does not contain any chlorine, phosphates, nitrates or heavy metals
- Can be disposed of with the used oil.

Application

- For oil sludge deposits
- For hydraulic valve lifters knocking
- For loss of compression from the piston rings
- When changing oil to ensure that the new engine oil is not contaminated by any residues of used oil

Instructions : Before changing the oil, add the product to the engine at operating temperature. Observe and adhere to the minimum and maximum oil levels. Allow the engine to run at idle speed for a maximum of 20 minutes with the vehicle at a standstill. Then change the oil and filter immediately afterwards.

Dosing : 400ml is sufficient for up to six litres of engine oil. **Caution!** Risk of engine damage in higher dilutions.

VOLUME

250 ml
