

## PRODUCT INFORMATION

### PRO CARE OIL LEAK STOP

#### Description

**Oil Leak Stop** is a specialty product meant for use when common problems like oil leaks or exhaust smoke occurs. It is specially designed to help rejuvenate seals and gaskets and improve sealing at valve guides, piston rings and cylinder walls. This results in a reduction or stop of oil loss and oil contamination and in better compression and thus superior engine performance.

#### Benefits

- ✓ Stops and prevents oil leakages through seals
- ✓ Eliminates the need for expensive engine repair
- ✓ Makes seals swell back to original size and regain all-new pliability
- ✓ Prolongs the service life of the engine
- ✓ Reduces emission of hazardous exhaust gases
- ✓ Improves engine performance by enhancing motor compression

#### Application

The additive can be used in all gasoline, diesel and LPG engines, with or without turbochargers. Mix this additive with the Rymax engine oils for an optimal result. Add the contents of one bottle Oil Leak Preventer to the warm motor oil, preferably shortly after oil change. 250 ml Oil Leak Preventer treats 3 to 6 litres of motor oil.

Most of these leaks can be stopped with the use of Oil Stop Leak which conditions, swells and softens seals, gaskets and O-rings. The use of this product will not dilute the additives in your motor oil. Engine Oil Stop Leak contains detergents, dispersants and anti-wear additives, like any high-quality motor oil.

Note: make sure the oil contents do not exceed the maximum oil level in your engine.
