

## PRODUCT INFORMATION

### PRO CARE RADIATOR CLEANER

#### Description

**Radiator Cleaner** is a cleaning concentrate for quick and easy cleaning of the cooling and heating system. Dissolves and binds oily and greasy residues. Penetrates and eliminates slime and corrosion deposits.

#### Benefits

- Cleaning of the cooling and heating system
- Dissolves and binds oily and greasy residues
- Neutralizes lime residues
- Penetrates and eliminates slime and corrosion deposits
- Protects the new cooling lubricant from old contamination

#### Application

- For all radiator repairs to rectify reduced cooling performance
- In case of deposits in the cooling circuit
- When changing the cooling lubricant
- For cleaning after engine repairs (oil in cooling system)

**Instructions :** Drain contaminated coolant before cleaning and fill with fresh water.

Top up the radiator cleaner and run the engine at operating temperature for approx. 30 minutes. Drain contaminated mixture – if heavily soiled, repeat treatment if necessary.

Rinse the cooling circuit with clean water. After cleaning refill the cooling system, bleed and check for leaks. Sufficient for up to 10 litres of coolant.

#### Note:

! We recommend replacing rubber parts damaged by oil ingress.
